Byte's 2022 program data

2022 End-Of-Year Program Evaluation

The following tables show the applied survey results. We used various surveys adapted to the sites where we carry out our activities. The questions were asked with binary and an ordinal scale.

General information from respondents	
Total participants surveyed	80
Age average	10
Female percentage	51
Male percentage	29
Surveyed children who participated for the first time in Byte in 2022	51
Percentage surveyed who took onsite courses	79%
Percentage surveyed who took virtual courses	21%
Virtual course population surveyed who borrowed a modem from Byte	12%

Scale | 1 (strongly disagree) – 5 (strongly agree)

Personal development	Result
[Anza and Don Bosco] Byte's sports activities made me a better athlete.	4.4
Byte's course activities helped improve my self-confidence.	4.5
The course activities motivated me to set more goals for myself.	4.5
Composite result	4.5
